

My Grand Experiment

1. What question do I want to explore or what idea do I want to test out?

2. How could I test it? (Refer to examples from presentation for ideas on experiments you could run for yourself) --this is brainstorming territory

3. How will I test it? --this is commitment time.

3. What do I hope happens with my experiment? What are my goals for this experiment? What would a “successful” outcome look like? What would an “unsuccessful” outcome look like?

4. How long will the experiment last?

5. When will I evaluate progress along the way? How will I evaluate progress?

6. How can I set myself up for success?

7. What obstacles do I anticipate and how can I address them?
